Match Information

- Each team will be given 4 matches.
- Matches will be run based upon the schedule which will be available at 12:30PM.
- Match schedules can be picked up at the registration tables.
- Ranking is determined by a team's highest score. In the case of a tie the 2nd highest score is used and so on though all 4 scores. Therefore it is important for all teams to compete in all 4 matches. If more than 2 teams are still tied after all 4 matches they all will move on to the finals.
- All teams competing in the finals will have one last opportunity to set a new high score. However ALL previous match scores still count in determining the the tournament champion. (i.e. If team A has a score of 40 and team B has a score of 38 going into the finals, team B must score at least 40 to tie or beat team A REGARDLESS of team A's score in the finals.)
- If teams are still tied after the finals they will all be declared tournament champions.
